Business Requirements Document (BRD)

DF Ticketing System

1. Introduction

The DF Ticketing System is a centralized platform for managing Reimbursement, Advance, and Procurement requests across Deshpande Foundation entities. The system automates approvals, finance processing, travel coordination, vendor payments, settlements, UTR tracking, and audit management.

2. Business Objectives

- Standardize financial workflows.
- Digitize reimbursement, advance, and procurement processes.
- Improve transparency and auditability.
- Reduce manual effort and approval delays.
- Support accounting and bank payment processes.

3. Scope

Modules:

- User Management
- Reimbursement Management
- Advance Management
- Procurement Management
- Travel Management
- Vendor Management
- Finance Processing
- Payment Management
- Reporting & Audit

4. Stakeholders

- Employee
- Reporting Manager
- Travel Team
- Purchase Team
- Finance Processor (Maker)
- Finance Approver (Checker)
- CEO
- Finance Admin
- System Administrator

5. Functional Requirements

User & Authentication:

- Login using DF email.
- Auto-fetch employee details.
- Track login history.

Reimbursement:

- Raise reimbursement requests.
- Upload bills.
- Manager approval.
- Finance maker-checker approval.
- Payment processing and closure.

Advance:

- Travel, local transport, and purchase advances.
- Travel booking workflow.
- Advance settlement process.
- Employee-to-finance and finance-to-employee settlements.

Procurement:

- Vendor selection.
- Purchase requisition.
- Purchase orders/work orders.
- Partial and full advance payments.
- Final invoice settlement.

Travel:

- Travel and accommodation requests.
- CEO approval for flight requests.
- Travel team booking support.

Finance:

- Approval processing.
- Bank file generation.
- UTR tracking.
- Tally export generation

6. Workflow Summary

Reimbursement:

Employee → Manager → Finance Processor → Finance Approver → Payment → Closed

Advance:

Employee → Manager → Travel Team + Finance → Payment → Settlement → Closed

Procurement:

Employee → Manager/Purchase → Vendor Selection → Finance → Payment → Invoice Settlement → Closed

7. Approval Matrix

- Manager based on reporting hierarchy.
- Finance Processor based on office location.
- Finance Approver based on entity.
- CEO approval mandatory for flight requests.

8. Reporting

- Pending approvals.
- Open tickets.
- Payment reports.
- UTR reports.
- Vendor payment reports.
- Budget utilization reports.
- Cost center reports.
- Audit reports.

9. Non-Functional Requirements

- Role-based access.
- Audit logs.
- Email notifications.
- Secure bank data.
- High availability.
- Scalable architecture.

10. Key Database Components

Users, Employees, Tickets, Payments, Vendors, Bills, Reimbursement Details, Roles, Cost Centers, Expense Categories, Ledgers, Ticket Logs, Payment Logs and History Tables.

11. Success Criteria

- End-to-end digital processing.
- Faster approvals.
- Improved audit compliance.
- Centralized financial tracking.
